

Pressure-sensitive adhesives

Hot Melt

Techni-Therm Direct II NTC / TP050 / 2.1 mil BG

ITEM #88513

ADHESIVE General purpose, strong permanent adhesive with good chill characteristics. TP050 has excellent initial tack with high bond strength at elevated, room and chilled temperatures, as well as in moist conditions. It has been formulated to adhere to a wide variety of substrates, including corrugated cardboard, low surface energy materials like polyethylene and non-polar surfaces. TP050 provides enhanced conversion characteristics, allowing die-cutting at higher speeds and is designed for both paper and synthetic face materials. Limitation: Not suitable for labelling plasticized.		
Type Permanent	Composition Hot Melt	Min. Application Temperature 23 F
Min. Service Temperature -40 F	Max. Application Temperature 158 F	
REGULATORY APPROVAL		
RoHS Yes	Prop65 Yes	REACH Yes
TPCH Yes	CPSIA Yes	UL No
Direct Food No	Indirect Food Yes
